------------------------	---

**Descriptive note:** None

**Display conditions:** None

**Date of entry in Register:** 10 May 2019

**Date of direction to issue a label:** No direction to issue a label has been issued

**Date of notice of decision:** 10 May 2019

### Summary of reasons for decision:

The publication is a short text document that instructs the reader how to make a 'grenade' using basic components, science-experiment style. The unrestricted availability of the publication is likely to be injurious to the public good. While the author's intent is not malicious, the device described could be capable of causing injury if mishandled or if it were to be used maliciously. Adults and teenagers are likely to recognise the dangers involved, but children may not and would need to be supervised while conducting an experiment such as this. The document is therefore restricted to those aged 13 and over. This is the lowest reasonable restriction on the right to freedom expression that can be applied in order to prevent injury to the public good.
